HEALTH

GUIDE TO SERVICES

KEY CONTACTS

Thank you for choosing Logan Health for the care of your patients. This reference guide is designed to assist you in accessing our broad range of medical and surgical specialties.

LOGAN HEALTH ONE CALL

(406) 751-8999

Call for any of the following needs:

Patient Transfers: Our Transfer Center is staffed 24/7 with a registered nurse who coordinates transfers into and out of the hospital, facilitating all communication between referring and receiving physicians, expediting bed assignments, sees to all transfer details, and partners with ALERT and other specialty transport teams as needed.

Medical Conversations: Medical Conversations are phone conversations that are initiated by providers seeking medical advice from a Logan Health specialist for a patient that they do not plan to transfer. These conversations are not comprehensive consults, but instead, medical advice is given based on the limited information given by the outside provider.

Telehealth Consults: Telehealth Video Consult begins with a medical conversation between the referring provider and the specialist in order to proceed with a video-consultation between the specialist and the patient. Telehealth video enables providers to evaluate patients remotely through a secure, real-time video connection. This service is commonly used for specialist consultations, evaluations, and follow up care.

LOGAN HEALTH NURSE CALL CENTER

(406) 890-7272

Logan Health Nurse Call Center is available 7 days a week, 8 a.m. to 6 p.m., including holidays to evaluate health concerns and connect you with available resources.

NEIGHBORS HELPING NEIGHBORS

(406) 758-1437

Logan Health Neighbors Helping Neighbors helps connect people to the resources necessary in regaining their health and independence.

The program has Social Service Advocates that team with volunteers to help clients referred by a medical or social service provider to connect to the social determinants of health resources they need to improve their quality of life.

ABOUT LOGAN HEALTH

Logan Health is a nonprofit, 558-bed health system in Montana. While the main medical campus is located in Flathead County, Logan Health draws from a total service area covering 20 counties, nearly 50,000 square miles and a population of nearly 700,000. The health system consists of six hospitals, more than 70 provider clinics and a host of other health care services, including the nation's first rural air ambulance service (A.L.E.R.T.), which it has maintained for more than 50 years. More than 4,500 physicians, nurses, health care professionals and support staff work together to provide patients and their families with a positive, proactive, patient-centered experience. Founded in 1910, Logan Health has provided exceptional care for more than 100 years to the communities it serves. Throughout its history, the organization has continued to grow and evolve with the growth and changing needs of the communities it serves.

Logan Health Children's – Kalispell

350 Sunnyview Lane

PHONE: **(406) 752-5111**

Logan Health Children's, a 190,000 square foot 501(c)(3), non-profit facility, was created to provide local access to high quality pediatric specialty care close to home, including the largest group of fellowship-trained pediatric specialists in the state. Highly skilled, highly trained medical staff, nurses, therapists, social workers and other health care professionals deliver pediatric care in an environment appropriate for children. With 30 inpatient beds including a Neonatal Intensive Care Unit, a Pediatric Intensive Care Unit and an acute care pediatric unit as well as dedicated spaces for family caregivers, Logan Health Children's has become a pediatric healthcare destination, saving the lives and improving the health of children across Montana.

ASSISTED LIVING | HOME CARE | LONG TERM CARE

Assisted living provides housing and support for adults who need help with daily activities like bathing, dressing, or managing medications, but do not need full-time nursing care. Residents live in private or semi-private apartments and receive meals, housekeeping, and personalized support to help them stay as independent as possible.

Home care provides medical or supportive services in a person's home to help with recovery, chronic conditions, or daily needs. **Hospice care** focuses on comfort and quality of life for people with serious illness, offering physical, emotional, and spiritual support for both patients and their families.

Long-term care offers 24/7 skilled nursing and support for individuals with complex medical needs or significant physical or cognitive limitations. Care is provided in a licensed facility and includes medical care and help with daily activities for those who can no longer live safely on their own.

Logan Health On-Demand Virtual Care

PHONE: **(406) 858-7978**

Logan Health's virtual, on-demand visits are a fast, convenient alternative to an in-person visit with Logan Health providers. On-demand virtual care visits can address many health conditions and are available **Monday through Friday from 8:00 a.m. to 5:00 p.m.** for adults and children.

SCHOOL-BASED HEALTH CENTERS

BUSINESS OFFICE PHONE: **(406) 858-3453**

Logan Health and area schools are partnering to create access to quality health care without needing to leave their school campus. Services available to students, staff and faculty include preventive care, acute health care, chronic care, mental health services and health education. We currently have school-based health centers in a number of Montana schools. Additional schools are seen by the school-based mobile unit. Scan QR code to see full list of locations.

REHABILITATION

Rehabilitation services help people recover strength, mobility, communication, and independence after injury, illness, or surgery. Our physical, occupational, and speech therapists provide personalized care to improve movement, daily living skills, swallowing, and speech—supporting recovery and helping patients return to the activities that matter most.

SPECIALTY CARE

Logan Health Breast Center – Kalispell

Our comprehensive care begins with our expert resources and advanced technology, including digital mammograms and a computer-assisted detection (CAD) system that aids our radiologists in the early detection of breast cancer. If breast cancer is confirmed, the cancer care teams determine the right treatment based on the cancer type, stage and size, as well as overall health.
